Current Status

Ministerial Exemption to collect all aquatic species in SA issued July 2009

Project: 100039

The Freshwater Aquatic Fauna of SA

Robert B McCormack & Jason Coughran

c/- Australian Aquatic Biological Pty Ltd, P.O. Box 3, Karuah, NSW, 2324.

Abstract

Full biological surveys will be conducted across the whole of SA in all freshwater environments. The main aim of these surveys is to increase the knowledge base on freshwater crayfish but all species will be surveyed and information collected & collated.

The first priority of this project is the production of a publication on the crayfish of SA as part of a series of books on the freshwater crayfish of each Australian state. This is a full colour guide to all the different species of freshwater crayfish found in SA. This is the smaller general public book suitable for everyone. It is the perfect book for anyone with an interest in crayfish, this full colour guide covers every species offering information on habitat, activities, description, conservation status, distribution and aquarium attributes. Full colour photographs of every species will allow all enthusiasts and researchers a better opportunity to identify the various species found in SA.
