

# Australian Aquatic Biological Pty Limited

A.C.N. 127 431 118

## Status 2012

On hold, A large number of new species from Queensland are currently under description and investigation, also a large number of other projects are ongoing. Once the majority of these species are described and projects completed this project will be back online. The smaller book "The Freshwater Crayfish of Queensland Australia" is expected 2014 and this publication will follow within 12 months.

Project 100011 *Tenuibranchiurus* ongoing.

Project 100017 The Spiny Crayfish of Australia is currently in print

Project 100030 *E. jagara* completed

Project 100033 *E. yigara* ongoing

Project 100044 Queensland *Cherax*, due completion 2013

Project 100054 *E. bindal*, due completion 2012

Project 100057 *E. madae*, due completion 2013

Project 100059 *E. urospinosus*, due July 2012

## Project: 100019

### The Field Guide to the Freshwater Crayfish of Queensland Australia

#### Publication

This is a large detailed full colour guide to all the different species of freshwater crayfish found in Queensland. This book is for the serious scientist, it explains in detail how to find and identify each species in Queensland and how to distinguish between them. It is A4 size full colour, hard covered 232 page book that offers information on habitat, activities, description, conservation status, distribution, morphological features and how to distinguish between species and help identify each species in Queensland. Full colour photographs of every species will allow all enthusiasts and researchers a better opportunity to identify the various species found in Queensland. This book is currently in draft form with completion and publication expected in 2015.

ISBN: 978 0 9805144-4-5 232 pages Full Colour, A4 hard cover.
