Expert Witness Aquaculture Facility Inspection & Valuation

Robert B McCormack: rob@aabio.com.au

Aquaculture consultancy

Australian Aquatic Biological was contracted to inspect an aquaculture facility and report on the facilities and aquaculture production in relation to an insurance claim. As this was more than likely to go to court an aquaculture expert witness was required to supply the necessary information to the court.

Insurance claims are today more complex than ever and reports by experienced and qualified expert witnesses can not only smooth the claims process but ensure both claimants and insurers are represented accurately and honestly.

If you have need of an aquaculture expert witness for any land based aquaculture matter please contact us.
