

Consult: C00184

Ballarat Barramundi Farm

Robert B McCormack: rob@aabio.com.au

Aquaculture Consultancy

Australian Aquatic Biological was contracted to be the acting consultants to arrange aquaculture permits to conduct intensive recirculating aquaculture within a warehouse at Ballarat, Victoria. We supplied all the design and site plans, filled in all the application and responded to all requests for information re Ballarat City Council, EPA, DEPI Fisheries, Southern Rural Water, Central Highlands Water and Prime Safe, etc.

A typical application for all permits requires approximately 100 pages of information. If you need an expert to help you contact us, we have received approval for over 50 aquaculture farms and our fees are very competitive - usually less than \$5000
